- Microsoft Office Suite

PROJECTS

Care Connection Application
Work request management software for a local nonprofit as part of the UNF Information Science capstone course. The project is designed to be completed throughout the fall and spring semesters. Uses ASP.NET Core with Entity Framework Core to build a database for clients to submit work orders that can be tracked, managed, and reported on by employees.

Freelance Web Development
Design and develop websites for personal and small business use. Currently working on a website for a local landscaping company.
